

Update: 10/2019

Quality Policy

Day Two microbiome sequencing Laboratory's management identified the opportunity to respond to the changing global environment and therefore decided to implement a quality management system according to the requirements of ISO9001:2015.

The aim of ISO 9001:2015 quality management in DayTwo laboratory is to provide DayTwo management certified ongoing evidence of excellent microbiome sequencing laboratory management.

The management commitment is to comply with all statutory requirements that are required of the organization's operation (national and international standards, regulations, orders and any other acts), including customer and interested parties' requirements.

The management will ensure the implementation of continual improvement process that is based on periodical determination and confirmation of goals and objectives with the aim of guaranteeing the satisfaction of its customers and providing an optimal solution to their needs and expectations.

This policy will be published and explained within and outside the organization according to the requirements of interested parties.
